ARTIFICIAL INTELLIGENCE

“ Artificial Intelligence is no match for natural stupidity ”

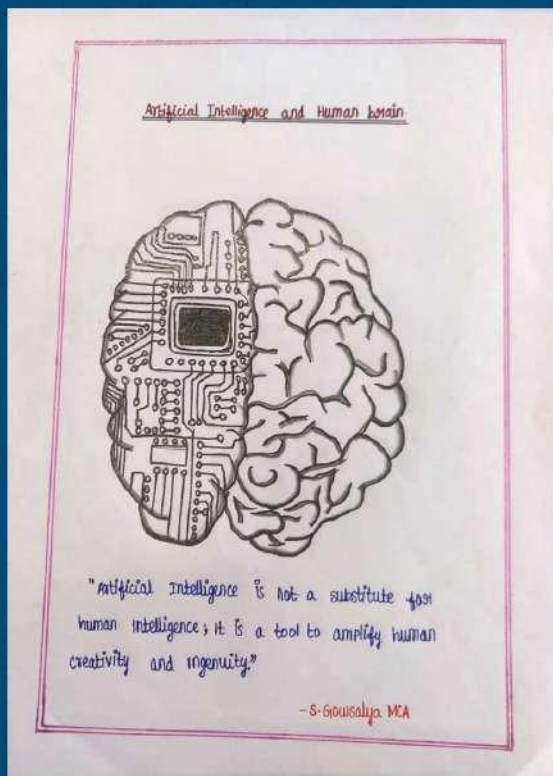

- Unknown

P. Nandhini (AI & DS)

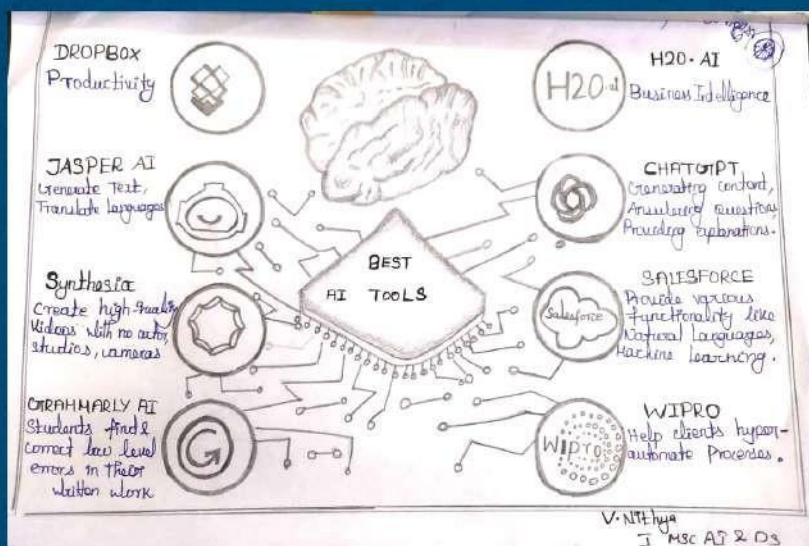

ARTIFICIAL INTELLIGENCE

Open AI's Chat GPT-3.5

S.Gowsalya (MCA)

ChatGPT is a language model developed by OpenAI, and it belongs to the GPT (Generative Pre-trained Transformer) family. Specifically, it is based on the GPT-3.5 architecture. GPT-3 (and its variations) is a state-of-the-art natural language processing model that is capable of understanding and generating human-like text based on the input it receives.

V. Nithya (AI & DS)

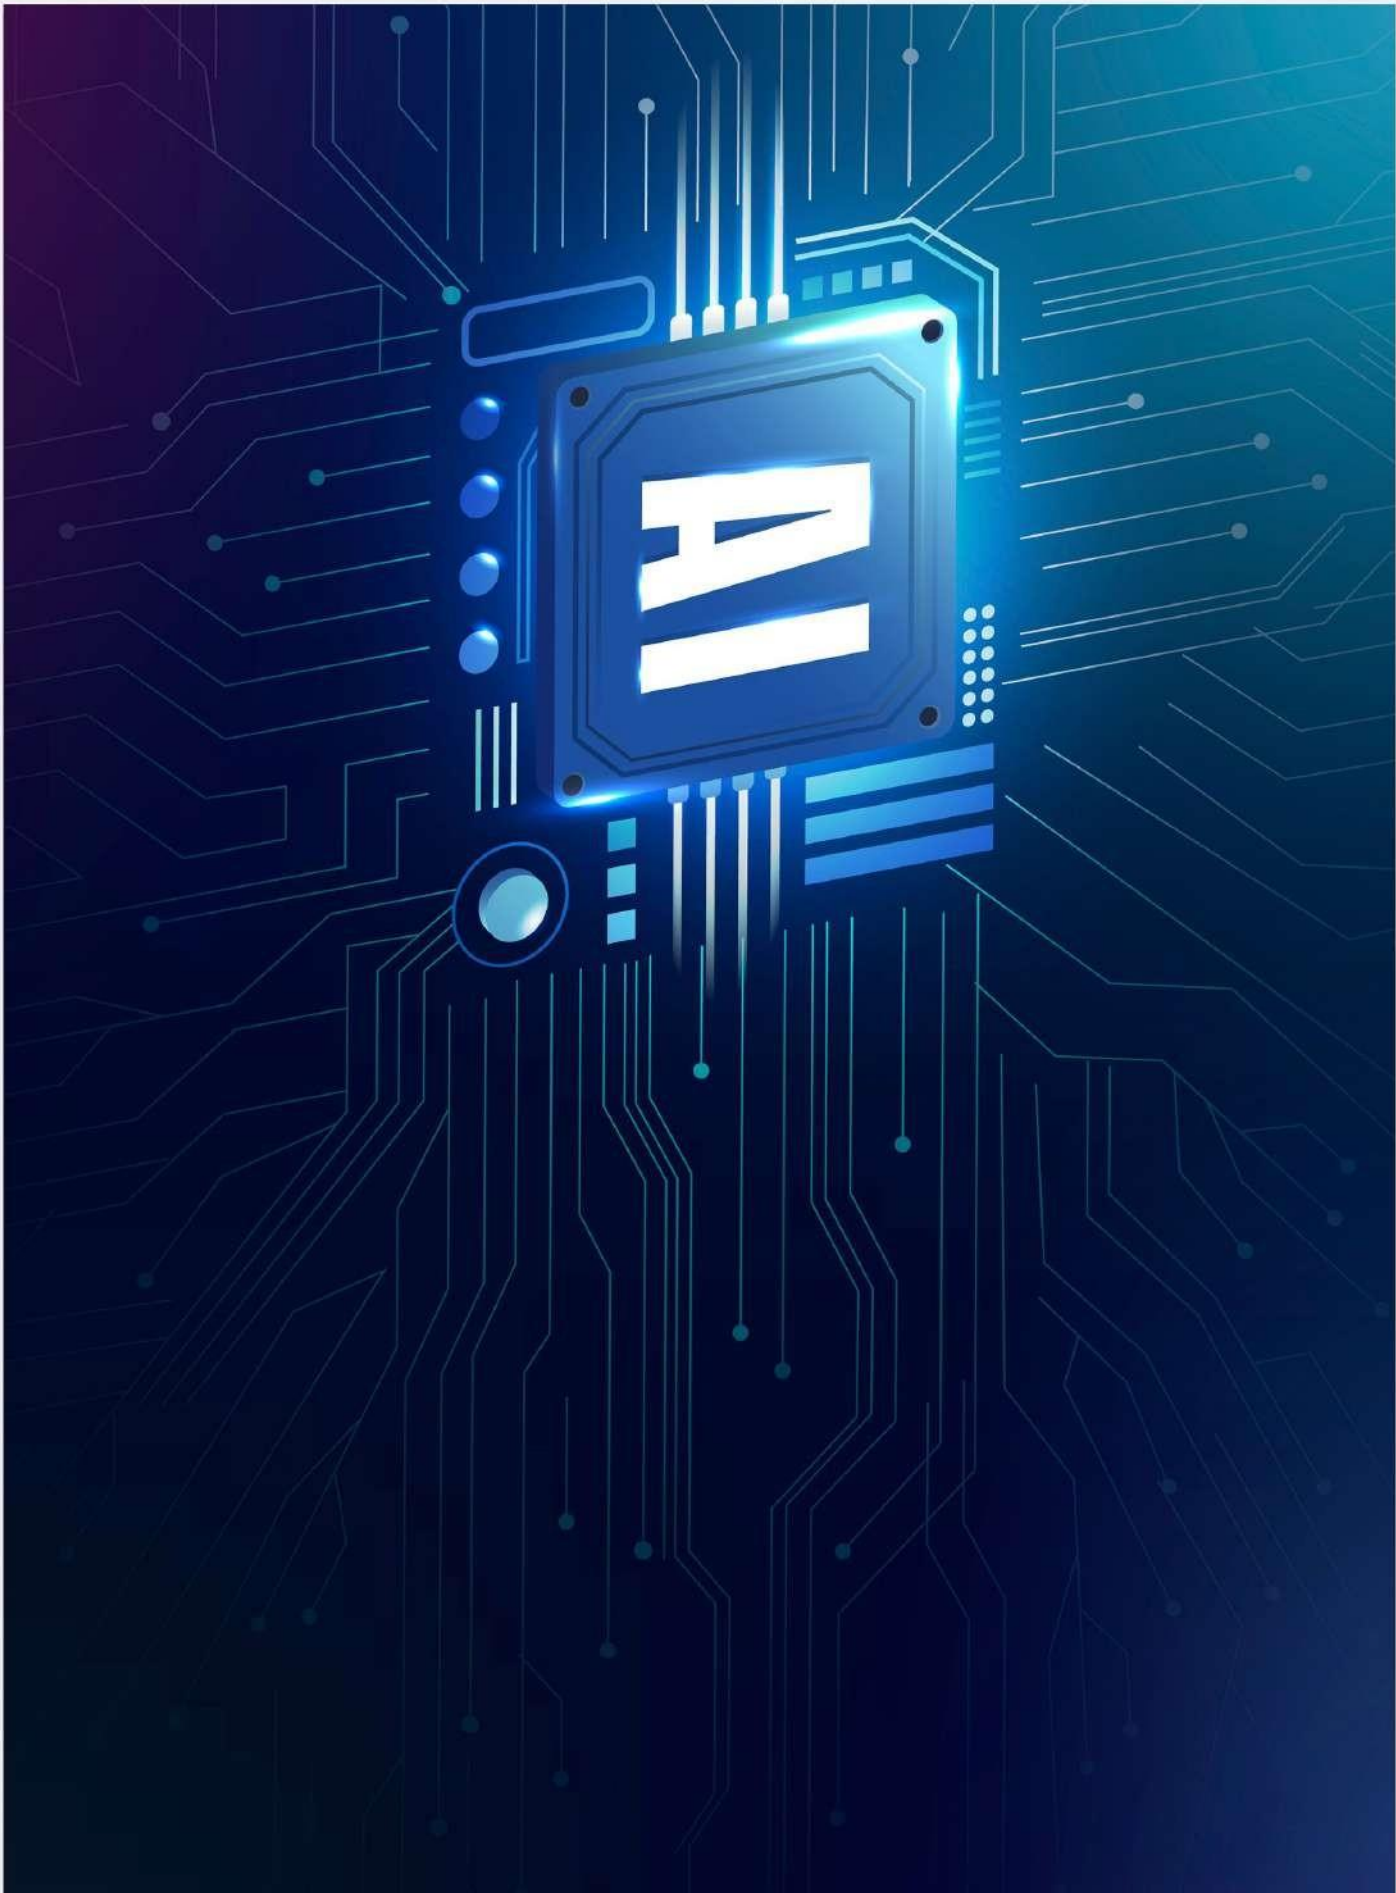

COMPUTER APPLICATIONS

NLP :

NLP stands for Natural Language Processing. It is a field of artificial intelligence (AI) that focuses on the interaction between computers and humans using natural language. The goal of NLP is to enable machines to understand, interpret, and generate human-like text or speech.
